NY5 COMMON CORE MATHEMATICS CURRICULUM Lesson 7 Homework 3•6

b. How many buildings are $4\frac{1}{4}$ inches tall?
3 buildings are $4\frac{1}{4}$ inches tall.

c. How many buildings are less than $3\frac{1}{2}$ inches?
7 buildings are less than $3\frac{1}{2}$ inches tall.

d. How many buildings are in the class mode? How do you know?
There are 25 buildings in the class model. I know because 1 building equals "x" and there are 25 x's on the chart.

e. Brook says most buildings in the model are at least 4 inches tall. Is she correct? Explain your thinking.
Yes Brook is right. 20 buildings are at least 4 inches tall and 5 buildings are more than 4 inches tall. 20 is more than 5.
